Volume 219 1994

Table of contents

No. 1/2 1– 712 issued on January 15, 1994
No. 3 713–1088 issued on February 1, 1994

Corrections 1087

Contents of Volume 219 I–XI

Reviews

Inhibition and catalysis of carbonic anhydrase – Recent crystallographic analyses
Anders Liljas, Kjell Håkansson, Bengt Harald Jonsson, Yafeng Xue 1–10

Heat-shock proteins as molecular chaperones
Jörg Becker, Elizabeth A. Craig 11–23

RNAs and ribonucleoproteins in recognition and catalysis
Tom H. Wittop Koning, Daniel Schümperli 25–42

Facilitative glucose transporters
Mike Mueckler 713–725

Priority Papers

Secondary structure and signal assignments of human-immunodeficiency-virus-1 protease complexed to a novel, structure-based inhibitor
Toshimasa Yamazaki, Linda K. Nicholson, Dennis A. Torchia, Stephan J. Stahl, Joshua D. Kaufman, Paul T. Wingfield, Peter J. Domaille, Sharon Campbell-Burk 707–712

Rab4 is phosphorylated by the insulin-activated extracellular-signal-regulated kinase ERK1
Mireille Cormont, Jean-François Tanti, Ahmed Zahraoui, Emmanuel Van Obberghen, Yannick Le Marchand-Brustel 1081–1085

Molecular cell biology and metabolism

Biosynthesis of carnosine and related peptides by skeletal muscle cells in primary culture
Karl Bauer, Michael Schulz 43–47

Molecular characterization of a human tyrosinase-related-protein-2 cDNA – Patterns of expression in melanocytic cells
Brigitte Bouchard, Véronique del Marmol, Ian J. Jackson, Dorra Cherif, Louis Dubertret 127–134

Quantitative stoichiometry of the proteins of the stimulatory arm of the adenylyl cyclase cascade in neuroblastoma x glioma hybrid, NG108-15 cells
Gun-Do Kim, Elaine J. Adie, Graeme Milligan 135–143

Intracellular expression of *Vitreoscilla* hemoglobin alters *Escherichia coli* energy metabolism under oxygen-limited conditions
Pauli T. Kallio, Dong Jin Kim, Philip S. Tsai, James E. Bailey 201–208

Leukotriene B_4 formation upon halothane-induced lipid peroxidation in liver membrane fractions under low O_2 concentrations *in vitro*
Josef Gut, Jörg Huwyler 287–295

Low-frequency stimulation of rat fast-twitch muscle enhances the expression of hexokinase II and both the translocation and expression of glucose transporter 4 (GLUT-4)
Sabine Hofmann, Dirk Pette 307–315

The involvement of polyamines in the activation of vitamin D receptor from porcine intestinal mucosa
Yoshihiro Morishima, Masaaki Inaba, Yoshiki Nishizawa, Hirotoshi Morii, Tadayoshi Hasuma, Isao Matsui-Yuasa, Shuzo Otani 349–356

Hepatocyte growth factor elevates the activity levels of glycolipid sulfotransferases in renal cell carcinoma cells
Takahiko Kobayashi, Koichi Honke, Shinsei Gasa, Tamotsu Miyazaki, Hisao Tajima, Kunio Matsumoto, Toshikazu Nakamura, Akira Makita 407–413

Purification, cDNA cloning and heterologous expression of human phosphomannose isomerase
Amanda E. I. Proudfoot, Gerardo Turcatti, Timothy N. C. Wells, Mark A. Payton, David J. Smith 415–423

A 40-kDa myelin basic protein kinase, distinct from erk1 and erk2, is activated in mitotic HeLa cells
Harald Heider, Corinne Hug, John M. Lucocq 513–520

Constitutive expression of functional P-glycoprotein in rat hepatoma cells
Olivier Fardel, Pascal Loyer, Valérie Lecureur, Denise Glaise, André Guillouzo 521–528

Cyclic AMP regulation of messenger RNA level of the stimulatory GTP-binding protein Gsα – Isoproterenol, forskolin and 8-bromoadenosine 3′:5′-cyclic monophosphate increase the level of Gsα mRNA in cultured astroglial cells
Karim Dib, Amina El Jamali, Claude Jacquemin, Claude Corrèze 529–537

Induction of lactase biosynthesis in the human intestinal epithelial cell line Caco-2
Hans-Peter Hauri, Brigitte Sander, Hassan Naim 539–546

Characterization and partial purification of the human receptor for the heat-stable enterotoxin
Sandhya S. Visweswariah, Vasanthi Ramachandran, Surabhi Ramamohan, Goutam Das, Janakiraman Ramachandran 727–736

Biochemical characterization of two forms of 3-hydroxy-3-methylglutaryl-CoA reductase kinase from cauliflower (*Brassica oleracia*)
Kathryn L. Ball, Susan Dale, John Weekes, D. Grahame Hardie 743–750

Expression of properdin in human monocytes
Wilhelm Schwaeble, Hartwig P. Huemer, Johannes Möst, Manfred P. Dierich, Marion Ströbel, Christine Claus, Kenneth B. M. Reid, H. W. Löms Ziegler-Heitbrock 759–764

Selective processing of submandibular rat 1 protein at dibasic cleavage sites – Salivary and bloodstream secretion products
Catherine Rougeot, Isabelle Rosinski-Chupin, Elisabeth Njamkepo, François Rougeon 765–773

Mammalian phosphatidylinositol 3'-kinase induces a lethal phenotype on expression in *Schizosaccharomyces pombe*; comparison with the *VPS34* gene product
Tsutomu Kodaki, Rüdiger Woscholski, Scott Emr, Michael D. Waterfield, Paul Nurse, Peter J. Parker 775–780

Probing olfactory receptors with sequence-specific antibodies
Jürgen Krieger, Sabine Schleicher, Jörg Strotmann, Ina Wanner, Ingrid Boekhoff, Klaus Raming, Pieter de Geus, Heinz Breer 829–835

Norepinephrine, unlike ATP, induces all-or-none increase in cytosolic calcium in thyroid cells – The role of inositol-trisphosphate-sensitive stores and calcium channels
Cinzia Bizzarri, Daniela Corda 837–844

Nucleic acids, protein synthesis and molecular genetics

Lead-ion-induced cleavage of RNase P RNA
Jerzy Ciesiolka, Wolf-Dietrich Hardt, Judith Schlegl, Volker A. Erdmann, Roland K. Hartmann 49–56

Heat shock enhances the amount of prenylated Dnaj protein at membranes of glyoxysomes
Regina Preisig-Müller, Gerhard Muster, Helmut Kindl 57–63

Undecagold cluster modified $tRNA^{Phe}$ from *Escherichia coli* and its activity in the protein elongation cycle
Bernd Blechschmidt, Vladimir Shirokov, Mathias Sprinzl 65–71

Polymorphism in the lipase genes of *Geotrichum candidum* strains
Maria Célia Bertolini, Louise Laramée, David Y. Thomas, Miroslaw Cygler, Joseph D. Schrag, Thierry Vernet 119–125

The 100-kDa chain of nicein/kalinin is a laminin B2 chain variant
Joëlle Vailly, Patrick Verrando, Marie-France Champliaud, Donald Gerecke, D. Wolf Wagman, Christian Baudoin, Daniel Aberdam, Robert Burgeson, Eugene Bauer, Jean-Paul Ortonne 209–218

Cloning of human acetyl-CoA carboxylase cDNA
Joohun Ha, Samira Daniel, In-Soo Kong, Chung-Kil Park, Hyi-Jeong Tae, Ki-Han Kim 297–306

Cloning and expression of cDNA of human Δ^4-3-oxosteroid 5β-reductase and substrate specificity of the expressed enzyme
Kazu-Hiro Kondo, Masa-Hiro Kai, Yoshiko Setoguchi, Gösta Eggertsen, Peter Sjöblom, Toshiaki Setoguchi, Kyu-Ichiro Okuda, Ingemar Björkhem 357–363

Hordothionins inhibit protein synthesis at the level of initiation in the wheat-germ system
Janna Brümmer, Hubert Thole, Klaus Kloppstech 425–433

Discrimination against misacylated tRNA by chloroplast elongation factor Tu
Manfred Stanzel, Astrid Schön, Mathias Sprinzl 435–439

Isolation and complete sequence of *CBR*, a gene encoding a putative cytochrome *b* reductase in *Saccharomyces cerevisiae*
Michael Csukai, Michael Murray, Elisha Orr 441–448

Purification and characterization of ATBP, a novel protein that binds to A/T stretches in three segments of the *Sarcophaga* lectin gene
Mayumi Matsui, Ayako Kobayashi, Takeo Kubo, Shunji Natori 449–454

The mercury(II) and high-salt-induced conformational B↔Z transitions of poly [d(G-m^5C) · d(G-m^5C)] as studied by non-polarized (ultraviolet) and circularly polarized (CD) ultraviolet spectroscopy
Dieter W. Gruenwedel 491–496

Functional differences in the promoters of the interferon-inducible (2'-5')A oligoadenylate synthetase and 6-16 genes in interferon-resistant Daudi cells
Matthew J. Guille, Carl D. Laxton, Michael N. Rutherford, Bryan R. G. Williams, Ian M. Kerr 547–553

Cloning and characterization of the gene for the catalytic subunit of cAMP-dependent protein kinase in the aquatic fungus *Blastocladiella emersonii*
Julio Cezar Franco de Oliveira, Ana Cláudia Cantisani Borges, Marilis do Valle Marques, Suely Lopes Gomes 555–562

Inducible nitric-oxide-synthase mRNA is transiently expressed and destroyed by a cycloheximide-sensitive process
Tom Evans, Adam Carpenter, Jonathan Cohen 563–569

The 30-kDa rat liver transcription factor nuclear factor 1 binds the rat growth-hormone proximal silencer
René J. Roy, Sylvain L. Guérin 799–806

The bilin-binding protein of *Pieris brassicae* – cDNA sequence and regulation of expression reveal distinct features of this insect pigment protein
Frank S. Schmidt, Arne Skerra 855–863

ATP-dependent DNA renaturation and DNA-dependent ATPase reactions catalyzed by the *Ustilago maydis* homologous pairing protein
Eric B. Kmiec, William K. Holloman 865–875

Cloning, expression, and spectroscopic studies of the Jun leucine zipper domain
Lisa G. Riley, F. Keith Junius, Michael K. Swanton, Natalie A. Vesper, Neal K. Williams, Glenn F. King, Anthony S. Weiss 877–886

Structure of the sea urchin hatching enzyme gene
Christian Ghiglione, Guy Lhomond, Thierry Lepage, Christian Gache 845–854

Protein chemistry and structure

Genuine and apparent cross-reaction of polyclonal antibodies to proteins and peptides
Lukas Leder, Hans Wendt, Christian Schwab, Ilian Jelesarov, Susanne Bornhauser, Friederike Ackermann, Hans Rudolf Bosshard 73–81

Cloning and expression of three abrin A-chains and their mutants derived by site-specific mutagenesis in *Escherichia coli*
Chih-Hung Hung, Ming-Chih Lee, Jeen-Kuan Chen, Jung-Yaw Lin 83–87

Solution structure of the variant-3 neurotoxin from *Centruroides sculpturatus* Ewing
Weontae Lee, Carolynn H. Moore, Dean D. Watt, N. Rama Krishna 89–95

Solution structure of synthetic peptides corresponding to the C-terminal helix of interleukin-6
Craig J. Morton, Richard. J. Simpson, Raymond. S. Norton 97–107

Isolation and structure of novel defensive peptides from frog skin
Amram Mor, Pierre Nicolas 145–154

Trp279 is involved in the binding of quaternary ammonium at the peripheral site of *Torpedo marmorata* acetylcholinesterase
Isabelle Schalk, Laurence Ehret-Sabatier, Françoise Bouet, Maurice Goeldner, Christian Hirth 155–159

Antagonism of the intracellular action of botulinum neurotoxin type A with monoclonal antibodies that map to light-chain epitopes
Isabelle Cenci di Bello, Bernard Poulain, Clifford C. Shone, Ladislav Tauc, J. Oliver Dolly 161–169

Reversible conformational transition gives rise to 'zig-zag' temperature dependence of the rate constant of irreversible thermoinactivation of enzymes
Vladislav Yu. Levitsky, Nikolay S. Melik-Nubarov, Virginius A. Siksnis, Valeriy Ya. Grinberg, Tatyana V. Burova, Andrey V. Levashov, Vadim V. Mozhaev 219–230

Correlation of high-temperature stability of α-chymotrypsin with 'salting-in' properties of solution
Vladislav Yu. Levitsky, Anna A. Panova, Vadim V. Mozhaev 231–236

Structure determination of extracellular fragments of amyloid proteins involved in Alzheimer's disease and Dutch-type hereditary cerebral haemorrhage with amyloidosis
Kay Sorimachi, David J. Craik 237–251

The molecular forms of acetylcholinesterase from *Necator americanus* (Nematoda), a hookworm parasite of the human intestine
David I. Pritchard, Alan Brown, Jean-Pierre Toutant 317–323

Photoaffinity labelling of cardiac membrane GTP-binding proteins in response to insulin
Martina Russ, Antje Wichelhaus, Ingo Uphues, Thomas Kolter, Jürgen Eckel 325–330

Characterisation of a trisulphide derivative of biosynthetic human growth hormone produced in *Escherichia coli*
Anne Munk Jespersen, Thorkild Christensen, Niels Kristian Klausen, Per Franklin Nielsen, Hans Holmegaard Sørensen 365–373

Characterization of native laminin from bovine kidney and comparison with other laminin variants
Anders Lindblom, Tracey Marsh, Charlotte Fauser, Jürgen Engel, Mats Paulsson 383–392

Expression, purification and characterization of the recombinant kringle 2 and kringle 3 domains of human plasminogen and analysis of their binding affinity for ω-aminocarboxylic acids
Daniel Marti, Johann Schaller, Brigitte Ochensberger, Egon E. Rickli 455–462

In vivo incorporation of copper into the iron-exchangeable and manganese-exchangeable superoxide dismutase from *Propionibacterium shermanii* – Amino acid sequence and identity of the protein moieties
Beate Meier, Anja P. Sehn, M. Eugenia Schininà, Donatella Barra 463–468

Expression and characterization of recombinant human and rat liver 6-pyruvoyl tetrahydropterin synthase – Modified cysteine residues inhibit the enzyme activity
Daniel M. Bürgisser, Beat Thöny, Udo Redweik, Peter Hunziker, Claus W. Heizmann, Nenad Blau 497–502

Purification and characterization of erythrocyte caldesmon – Hypothesis for an actin-linked regulation of a contractile activity in the red blood cell membrane
E. der Terrossian, C. Deprette, I. Lebbar, R. Cassoly 503–511

Three-dimensional structure of (1–71)bacterioopsin solubilized in methanol/chloroform and SDS micelles determined by ^{15}N-^{1}H heteronuclear NMR spectroscopy
Konstantine V. Pervushin, Vladislav Yu. Orekhov, Alexander I. Popov, Larisa Yu. Musina, Alexander S. Arseniev 571–583

Characterisation and amino acid sequence of cytochrome *c*-550 from *Thiosphaera pantotropha*
Bart Samyn, Ben C. Berks, M. Dudley Page, Stuart J. Ferguson, Jozef J. Van Beeumen 585–594

Magnetic-circular-dichroism studies of *Escherichia coli* cytochrome *bo* – Identification of high-spin ferric, low-spin ferric and ferryl [Fe(IV)] forms of heme *o*
Myles R. Cheesman, Nicholas J. Watmough, Robert B. Gennis, Colin Greenwood, Andrew J. Thomson 595–602

Fluorescence resonance energy transfer within the regulatory light chain of myosin
Wylinn Boey, William Huang, Bruce Bennetts, John Sparrow, Cristobal dos Remedios, Brett Hambly 603–610

^{1}H resonance assignments and secondary structure of the carbon monoxide complex of soybean leghemoglobin determined by homonuclear two-dimensional and three-dimensional NMR spectroscopy
Dimitrios Morikis, Christopher A. Lepre, Peter E. Wright 611–626

Proteinase yscD (oligopeptidase yscD) – Structure, function and relationship of the yeast enzyme with mammalian thimet oligopeptidase (metalloendopeptidase)
Markus Büchler, Ursula Tisljar, Dieter H. Wolf 627–639

The amino acid sequence of iguana (*Iguana iguana*) pancreatic ribonuclease
Wei Zhao, Jaap J. Beintema, Jan Hofsteenge 641–646

Luminescence spectroscopy of pyridoxic acid and pyridoxic acid bound to proteins
Oh-Shin Kwon, Manuel Blazquez, Jorge E. Churchich 807–812

Electron transfer reaction of stellacyanin at a bare glassy carbon electrode
Osamu Ikeda, Takeshi Sakurai 813–819

Backbone dynamics of (1–71)bacterioopsin studied by two-dimensional ^{1}H-^{15}N NMR spectroscopy
Vladislav Yu. Orekhov, Konstantine V. Pervushin, Alexander S. Arseniev 887–896

Site-specific mutagenesis of residues in the human C5a anaphylatoxin which are involved in possible interaction with the C5a receptor
Peter Bubeck, Joachim Grötzinger, Monica Winkler, Jörg Köhl, Axel Wollmer, Andreas Klos, Wilfried Bautsch 897–904

Purification, characterization and molecular cloning of human hepatic lysosomal acid lipase
Detlev Ameis, Martin Merkel, Christoph Eckerskorn, Heiner Greten 905–914

Conformational study of a salivary proline-rich protein repeat sequence
Nicola J. Murray, Michael P. Williamson 915–921

Study of the interaction between salivary proline-rich proteins and a polyphenol by ^{1}H-NMR spectroscopy
Nicola J. Murray, Michael P. Williamson, Terence H. Lilley, Edwin Haslam 923–935

Isolation and characterization of hirustasin, an antistasin-type serine-proteinase inhibitor from the medical leech *Hirudo medicinalis*
Christa Söllner, Reinhardt Mentele, Christoph Eckerskorn, Hans Fritz, Christian P. Sommerhoff 937–943

The glucose transporter of *Escherichia coli* – Assignment of the ^{1}H, ^{13}C and ^{15}N resonances and identification of the secondary structure of the soluble IIB domain
Simona Golic Grdadolnik, Matthias Eberstadt, Gerd Gemmecker, Horst Kessler, Andreas Buhr, Bernhard Erni 945–952

Evolutionary relationships among pyridoxal-5′-phosphate-dependent enzymes – Regio-specific α, β and γ families
Frederick W. Alexander, Erika Sandmeier, Perdeep K. Mehta, Philipp Christen 953–960

Study of tissue-type plasminogen activator binding sites on fibrin using distinct fragments of fibrinogen
Patrick Grailhe, Willem Nieuwenhuizen, Eduardo Anglés-Cano 961–967

Expression cloning of an equine T-lymphocyte glycoprotein CD2 cDNA – Structure-based analysis of conserved sequence elements
Angela S. Tavernor, Julia H. Kydd, Dale L. Bodian, E. Yvonne Jones, David I. Stuart, Simon J. Davis, Geoffrey W. Butcher 969–976

Enzymology

Dephosphorylation of phosphopeptides by calcineurin (protein phosphatase 2B)
Arianna Donella-Deana, Marie H. Krinks, Maria Ruzzene, Claude Klee, Lorenzo A. Pinna 109–117

Stimulation of phospholipase C-β_2 by recombinant guanine-nucleotide-binding protein $\beta\gamma$ dimers produced in a baculovirus/insect cell expression system – Requirement of γ-subunit isoprenylation for stimulation of phospholipase C
Alexander Dietrich, Michael Meister, Derek Brazil, Montserrat Camps, Peter Gierschik 171–178

Metallobiochemistry of the magnesium ion – Characterization of the essential metal-binding site in *Escherichia coli* ribonuclease H
H.-W. Huang, J. A. Cowan 253–260

Alteration of the cleavage mode and of the transglycosylation reactions of the xylanase A of *Streptomyces lividans* 1326 by site-directed mutagenesis of the Asn173 residue
Alain Moreau, François Shareck, Dieter Kluepfel, Rolf Morosoli 261–266

Chlorophyll synthetase cannot synthesize chlorophyll *a*′
Michael Helfrich, Siegrid Schoch, Ulrika Lempert, Edmund Cmiel, Wolfhart Rüdiger 267–275

Purification, characterization and inhibition of dihydropyrimidinase from rat liver
Mariko Kikugawa, Masae Kaneko, Shigeko Fujimoto-Sakata, Mitsuko Maeda, Koichi Kawasaki, Tatsuya Takagi, Nanaya Tamaki 393–399

Mechanisms involved in serum-dependent inactivation of the immunotoxin enhancers monensin and carrier-protein–monensin
Antonia Franceschi, Franco Dosio, Cristina Anselmi, Roberto Chignola, Carola Candiani, Marcella Pasti, Giuseppe Tridente, Marco Colombatti 469–479

Secretion, purification and characterization of a soluble form of the yeast *KEX1*-encoded protein from insect-cell cultures
Lilian Latchinian-Sadek, David Y. Thomas 647–652

Activation of rat liver AMP-activated protein kinase by kinase kinase in a purified, reconstituted system – Effects of AMP and AMP analogues
John Weekes, Simon A. Hawley, Julia Corton, David Shugar, D. Grahame Hardie 751–757

Reconstitution of adipokinetic hormone biosynthesis *in vitro* indicates steps in prohormone processing
Richard C. Rayne, Michael O'Shea 781–789

Overexpression of a cytochrome *P*-450 of the 2a family (Cyp2a-5) in chemically induced hepatomas from female mice
Youssef Jounaïdi, Claude Bonfils, François Périn, Masahiko Negishi, Reinhard Lange 791–798

Identification of a glutamate residue at the active site of xylanase A from *Schizophyllum commune*
Mark R. Bray, Anthony J. Clarke 821–827

The catalytic properties of the reverse transcriptase of the lentivirus equine infectious anemia virus
Tami Rubinek, Shoshana Loya, Miriam Shaharabany, Stephen H. Hughes, Patrick K. Clark, Amnon Hizi 977–983

Polyhydroxynaphthalene reductase involved in melanin biosynthesis in *Magnaporthe grisea* – Purification, cDNA cloning and sequencing
Anne Vidal-Cros, Fabrice Viviani, Gilles Labesse, Martine Boccara, Michel Gaudry 985–992

Probing conformational states of spin-labeled aspartate aminotransferase by ESR
Michael Sterk, Helmut Hauser, Derek Marsh, Heinz Gehring 993–1000

CMP-*N*-acetylneuraminic acid hydroxylase from mouse liver and pig submandibular glands – Interaction with membrane-bound and soluble cytochrome b_5-dependent electron transport chains
Lee Shaw, Petra Schneckenburger, Wiebke Schlenzka, Jens Carlsen, Kirsten Christiansen, Dorthe Jürgensen, Roland Schauer 1001–1011

Effects of protons on the thrombin-fibrinogen interaction
Matilde Picozzi, Raffaele Landolfi, Raimondo De Cristofaro 1013–1021

Carbohydrates, lipids and other natural products

The role of trehalose synthesis for the acquisition of thermotolerance in yeast – I. Genetic evidence that trehalose is a thermoprotectant
Claudio De Virgilio, Thomas Hottiger, Judith Dominguez, Thomas Boller, Andres Wiemken 179–186

The role of trehalose synthesis for the acquisition of thermotolerance in yeast – II. Physiological concentrations of trehalose increase the thermal stability of proteins *in vitro*
Thomas Hottiger, Claudio De Virgilio, Michael N. Hall, Thomas Boller, Andres Wiemken 187–193

Glycosylation of two recombinant human uterine tissue plasminogen activator variants carrying an additional *N*-glycosylation site in the epidermal-growth-factor-like domain
Günter Pfeiffer, Karl-Hermann Strube, Martin Schmidt, Rudolf Geyer 331–348

Molecular cloning and expression of chick embryo Galβ1,4GlcNAcα2,6-sialyltransferase – Comparison with the mammalian enzyme
Nobuyuki Kurosawa, Mikiko Kawasaki, Toshiro Hamamoto, Takashi Nakaoka, Young-Choon Lee, Masanobu Arita, Shuichi Tsuji 375–381

The structure of the O-specific polysaccharide of *Citrobacter* O16 containing glycerol phosphate
Nina A. Kocharova, Jane E. Thomas-Oates, Yuriy A. Knirel, Alexander S. Shashkov, Ursula Dabrowski, Nikolay K. Kochetkov, Evgeny S. Stanislavsky, Elena V. Kholodkova 653–661

^{1}H one-dimensional and two-dimensional NMR studies of the ferricytochrome *c* 551 from *Rhodocyclus gelatinosus*
Lucia Banci, Ivano Bertini, Maria Teresa Cambria, Francesco Capozzi, Alexander Dikiy 663–669

The derivation of the formyl-group oxygen of chlorophyll *b* in higher plants from molecular oxygen – Achievement of high enrichment of the 7-formyl-group oxygen from $^{18}O_2$ in greening maize leaves
Robert J. Porra, Wolfram Schäfer, Edmund Cmiel, Ingrid Katheder, Hugo Scheer 671–679

Immunobiological properties of chemically defined lipid A from lipopolysaccharide of *Porphyromonas* (*Bacteroides*) *gingivalis*
Tomohiko Ogawa 737–742

The metabolism of 2-fluoro-2-deoxy-D-glucose in human chondrocytes and its incorporation into keratan sulfate proteoglycans
Gönna Fedders, Rüdiger Kock, Eddy Van de Leur, Helmut Greiling 1063–1071

Differential secretion of α1-acid glycoprotein occurs in the Golgi complex of isolated rat hepatocytes – Evidence of partial retention in the Golgi
Christian Poüs, Jean Guibourdenche, Anne Drechou, Geneviève Durand 1073–1079

Membranes and bioenergetics

Surface potential regulation of phospholipid composition and in-out translocation in yeast
Jorge Cerbón, Victor Calderón 195–200

Molecular cloning and expression of a cDNA encoding human electron transfer flavoprotein-ubiquinone oxidoreductase
Stephen I. Goodman, Kathleen M. Axtell, Laurence A. Bindoff, Shannon E. Beard, Ronald E. Gill, Frank E. Frerman 277–286

Contribution of phospholipases A_2 and D to arachidonic acid liberation and prostaglandin D_2 formation with increase in intracellular Ca^{2+} concentration in rat peritoneal mast cells
Tsuyoshi Ishimoto, Satoshi Akiba, Takashi Sato, Tatsuzo Fujii 401–406

Nitric oxide reductase from *Pseudomonas stutzeri* – Primary structure and gene organization of a novel bacterial cytochrome *bc* complex
Walter G. Zumft, Cornelia Braun, Heinrich Cuypers 481–490

Effect of acclimation temperature on the concentration of uncoupling protein and GDP binding in rat brown fat mitochondria
Sabine Feil, Johannes Rafael 681–690

Two binding sites of inhibitors in NADH: ubiquinone oxidoreductase (complex I) – Relationship of one site with the ubiquinone-binding site of bacterial glucose:ubiquinone oxidoreductase
Thorsten Friedrich, Petra van Heek, Hans Leif, Tomoko Ohnishi, Edgar Forche, Brigitte Kunze, Rolf Jansen, Wolfram Trowitzsch-Kienast, Gerhard Höfle, Hans Reichenbach, Hanns Weiss 691–698

The mode of action of SA-FF22, a lantibiotic isolated from *Streptococcus pyogenes* strain FF22
Ralph Jack, Roland Benz, John Tagg, Hans-Georg Sahl 699–705

Aluminium fluoride and magnesium, activators of heterotrimeric GTP-binding proteins, affect high-affinity binding of the fungal toxin fusicoccin in the fusicoccin-binding protein in oat root plasma membranes
Albertus H. De Boer, Gineke W. Van der Molen, Hidde B. A. Prins, Henrie A. A. J. Korthout, Paulus C. J. Van der Hoeven 1023–1029

Electropermeabilization mediates a stable insertion of glycophorin A with Chinese hamster ovary cell membranes
Khalid El Ouagari, Hervé Benoist, Sophie Sixou, Justin Teissie 1031–1039

Kinetic resolution of the reaction catalysed by proton-translocating transhydrogenase from *Escherichia coli* as revealed by experiments with analogues of the nucleotide substrates
Mike Hutton, Joanna M. Day, Tania Bizouarn, J. Baz Jackson 1041–1051

Inhibition of the synthesis of a cytochrome-*c*-oxidase subunit isoform by antisense RNA
Dorianna Sandonà, Roberto Bisson 1053–1061

Indexed in *Current Contents*
